

BPOWER 005 EFB 65Ah 550A

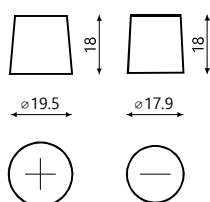

Batteries from the START & STOP EFB series are characterized by increased lifetime and cyclic durability (up to three times longer compared to standard batteries.). Thanks to the special addition to the electrodes (Super Expanded 3XD - Graphite), EFB batteries are an ideal solution wherever there is an increased demand for electricity (e.g. for cars with a start-stop system or taxis). Thanks to the hermetic construction and the use of explosion proof inserts, the battery can be successfully installed in the trunk or inside the vehicle.
